WHTHE WOMEN ARE NON VOTING

The first convention demanding suffrage for women was hold in Sunce Falls, in the state of women was beld in Sunce Falls, in the state of women was hold in Sunce Falls, in the state of women was beld in Sunce Falls, in the state of New York in the month of Joly, 1848. To day in the territories of Wyoming Utah and in 1qclre states they have the bullot, in school elections. Also they have full suffrage in the list of Man and the colony of vactors, and in 1qclre states they have the bullot, in School elections. Outarn and Nova Schools, and uniterpal suffrage for years and two Canadian provinces Outarn and Nova Schools, and another provinces of women have suffrage on several metters. In British Columbia women were granted the school ballot last wince, and, if I am correctly informed tax paying women of that provinces may also vote in municipal elections.

The right of suffrage has in most of these cases been enjoyed by women for several years, and it is a not worthy fact that in no inbutance has it bett withdrawn, but, on the contract of the right In Wyoming the law was passed fifteen years age and the ovin which were predicted by the opponents of women soffrage to arise from it—the destruction of social and house and wise, the unstability of marriage, and in short, the mean and except and the suffer of the universal of the state of the contract of the last men and women of these alleged would result from such a rudbed innovation provided mothing but the most desirable results of the contract of the suffer of the contract of the suffer of the contract of the contract

ALLEGED INTELLECTUAL DISPARITY
Moth has been said about the comparative
tretilectual endowment of men and women.
Opinion is divided upon the question. And
yes sacred and professe history is filted with
accounts of the frest deeds of great women.
Wome is have ruled lingdoms tournanded
ermines, shope in literature and expelled in
statt craft, and if the number of such women
is tests than the number of men who have quespied asim far positions, this is readily accounted
for in the fact that opportunities of women
have been fewer. With few exceptions, such
the saccession to the drown in a monacity;
when woman has arisen to eminonce the has
had to burst the shockles with which contor
and man a tyranny had bound her, and vice
superior to her avivronment by the very force
of her genius and her linellectual poster. Intellectual appreparity of men over women is affifound in our educational institutions. It is
not found in any boatton where women have chlectual superiority of men over women is 10% found in our educational institutions. It is not found in any position where women have entered upon the performance of intellectual labors with the same training and preparation as men. But the whole question of woman a intellectual capacity is irrelevant to the question of her right to the halot. We have no aristocracy of intelligence by which the nation of the state is to be governed. However well it might be to require a qualification for retermined the property of the first whole the property of the first kind now required. Thousands of men votain the United States who cannot read their ballow, and any test which might be regularly would delier The tich triain remain ing the sing stream the state of the property formed the statistic order of the state of the
